control your lifestyle  
& enjoy the  
freedom

# Alfresco SlidaSpan™

The Alfresco SlidaSpan™ roofing system gives you complete control over your living and leisure areas with panels that slide rather than rotate dropping water and debris. When closed SlidaSpan™ offers you the benefits of a patio protecting you from rain, hail and shine. When opened the panels create a pergola welcoming filtered sunlight into your home. Take control of your lifestyle and enjoy the freedom with an Alfresco SlidaSpan™ today!

# SlidaSpan™ Roof Profile

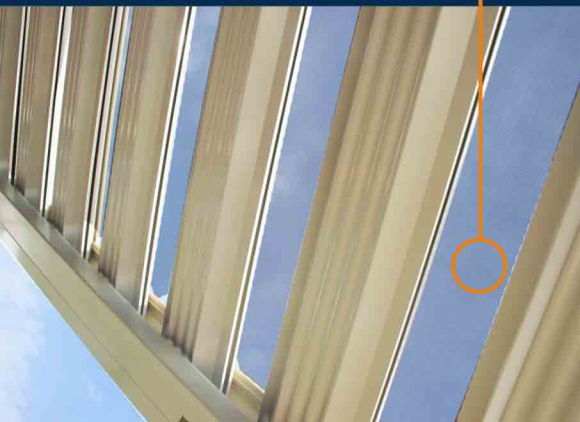

- High tensile steel with Aluzinc coating for increased weather durability
- High sheen baked-on paint coat retards heat transfer and refracts light whilst providing an attractive finish

# Mesh Screen & Panel Seals

- Panel seals enable panels to be waterproof when fully closed
- Protective mesh screens provide up to 30% UV protection for your family while still allowing filtered light through

# Automatic Drive

## Advance Control Unit

With the automatic drive unit and control system Spanline's Alfresco SlidaSpan™ can be fully automated by pre-sets or controlled at the touch of a button. This gives you the control over opening and closing times when it begins to rain with the climatic sensor.

Set your SlidaSpan™ to automatically shut when strong wind picks up or when it starts to rain. The Alfresco SlidaSpan™ is fully controlled by remote, palm top or mounted wall unit and can be controlled to open on sun.

This unique automation gives you a reliable living area to enjoy the lifestyle you desire. The Alfresco SlidaSpan™ will bring more light into your home, more warmth in winter and more shade in summer while keeping your outdoor living area dry and free from debris.

**Alfresco SlidaSpan....climate control for the great outdoors**

# SlidaSpan™ Optional Extras

## Features include:

- 5 Wind/Sun levels which can be set and adjusted directly from the transmitter
- Upgraded motors to suit safety block in case obstacles, inserted bolts or ice prevent movement
- Precision in maintaining the set values ensuring optimal force and movement over time
- Quick and easy stop, start and adjustment from the transmitter
- Programmable memory, weather settings and timer
- Rain sensor memory and settings
- Slide speeds

Modular transmitters, wall-mounted rests and portable supports.

Remote transmitters; concealed, portable or wall-mounted transmitters; multipurpose programmable timer.

Directional Wind, Sun & Rain sensor with variable sensitivity on multiple levels. Radio controlled.

Palm top device which interfaces with programming software.

# Manual Drive

The simple to operate manual drive handle makes adjusting your SlidaSpan™ easy. To open, just attach the drive handle to the loop hole and rotate the handle approximately 15 times clockwise. To close, simply reattach the handle and rotate approximately 15 times anticlockwise, it's that easy.

Manual Drive Handle

# Lifestyle

The Alfresco SlidaSpan™ product offers you complete satisfaction and comfort all year round. You can protect and enhance your lifestyle in a matter of moments. This unique product allows you to control the amount of sunlight and shade whilst giving you the security that your entertaining won't be disrupted by rain or wind carried debris.

More light into your home  
More warmth in Winter  
More shade in Summer
