Superior home additions to enhance your lifestyle and boost the value of your property

### **SUPERIOR HOME ADDITIONS TO ENHANCE**

your lifestyle and boost the value of your property.

Spanline Home Additions was established in 1985, which means that it has amassed more than 23 years experience in the home additions industry. It is also a national group with more than 36 outlets across Australia, each staffed with team members whose objective is not just to meet your product and service expectations but to exceed them.

Each year Spanline completes more than 6000 home addition projects nationwide and understands that precise compliance with local and national building regulations is essential. That's why all Spanline team members are fully trained and have a thorough understanding of the conditions and regulations in your local area - after all, the friendly staff at your nearest Spanline outlet are local people, just like you.

You can rest assured that Spanline uses only registered builders who will manage the building

approvals process for you and keep in regular communication with you throughout the entire design and construction process. They also offer the security of a nationally registered warranty and all team members are committed to Spanline's National Customer Service Code.

Specialising in patios, awnings, glass and screened rooms, verandahs, carports, shelters, and insulated roof and wall panels, Spanline offers a vast array of design options which can be custom designed to suit your lifestyle. So whether your home is traditional or contemporary in style, their fully trained Design Assessors will help you create the perfect home addition for you.

Spanline's exclusive steel 'Double U' roof profile with its superior strength and rigidity is one of the major differences between a Spanline home addition and that of its competitor. With its baked-on paint coat, the exclusive shape gives Spanline's roof sheet unique light refractive properties which

will actually help to insulate your home against excessive cold and heat.

The strength of Spanline's exclusive roof sheet allows them to create home additions with wider roof spans and fewer supporting beams and posts. This means your home addition is tailored to suit you and the existing architecture of your home and your outlook will not be impaired by undue supporting structures.

Spanline's 'Double U' roof profile and integrated building system really is ideal for creating a functional and versatile year-round lifestyle solution for you and your family. A Spanline home addition can add valuable space for hobbies and leisure while helping to create an environment that's warmer in winter and cooler in the summer.

With Spanline's superior steel roof profile, completely integrated building system and innovative home addition designs, homeowners can now create their ultimate year-round lifestyle solution with a Spanline home addition. So if you're serious about your next home addition it's worth talking to Spanline. After all they know you take pride in your home, that's why they take pride in their work!
