### Case Study: Mullion Creek Primary School Shelter

Mullion Creek Primary School reached out and were looking to add a sheltered area for their students between classrooms for added protection. They weren't sure what they wanted exactly but they knew they needed a covered area.

After going out and looking at the area and speaking with the staff we came up with the idea of adding a freestanding insulated Patio area to the existing slab area. This would give students plenty of sheltered space whilst also providing protection for the children going from classroom to classroom. Ezi Struct® insulated roofing panels, PVC pipes and Spanline guttering were used to achieve this. We also added steel powder coated posts coated in hi-vis yellow for safety.

This has allowed the students and the staff to have a large, sheltered area to enjoy all year round.
